

Risk Assessment and Actions for Camping at Piddinghoe from 4th July 2020

The following sub-risks and mitigating actions are there to prevent the main risk that because we are allowing camping at Piddinghoe, there is an increased risk that COVID-19 will be passed-on.

Risks	Mitigating actions	Responsible person	Implemented (Y/N)?
Campers do not understand, or follow, government advice on hygiene and social distancing	Provide a link on the Registration Form to government advice, along with warnings that they will be asked to leave the campsite immediately	Richard Beal	
Risk of infection increases because nobody is enforcing the measures identified here	Use Nick Blackburn as single point of contact for camping.	Nick Blackburn	
Campers arrive with COVID-19	Provide a list of symptoms on the registration form on arrival, with instructions to inform the campsite co-ordinator & turn-around immediately if they have any	Richard Beal	
Campers acquire COVID-19 symptoms on site	Registration form to tell campers to depart the site immediately, and to inform the co-ordinator of the symptoms as soon as possible after having left, and to fill in a leaving form as soon as possible after having left. Registration form to instruct campers not to share implements, plates, mugs, glasses, cutlery etc with other campers. Registration form to tell campers that they must not hold an event on-site (like a birthday party). On registration form advise about hygiene. Registration form to advice campers to keep caravans and tents well-ventilated. Registration form to tell campers not to play music outside which will increase the risk of them talking loudly and possible spreading the virus. Registration form to advise on social distancing and maximum group numbers.	Richard Beal	
Campers take away COVID-19 from the site and infect others	Make campers fill-in a leaving form to state their health condition on departure. Information will be	Nick Blackburn	

Risks	Mitigating actions	Responsible person	Implemented (Y/N)?
	passed to government track & trace.		
Campers are not sufficiently prevented from acquiring COVID-19 on site	Keep toilets clean. Shut changing rooms. Keep sanitiser bottles topped-up.	Nick Blackburn	
Too many campers increase the risk of transmission	Implement increased distancing between pitches. Only allow campers who are members (including family membership) and are camping to increase the pleasure of participating in sailing rather than as a recreation in itself. Increase daily rates in order to cover our increased costs and deter over-use.	Nick Blackburn	
Camping waste provides an increased risk of cross-infection	On registration form, instruct campers to collect and take-away their own rubbish, and remind them on the leaving form	Richard Beal
